

Trimix TMX

TRIMIX (TMX E TME)

Modular and extendible hermetic units for the accurate metering by weight of powdered minor ingredients. High precision and reliability. No leftovers within the storing units or the dosing station. No powder leakage thanks to the suction system which acts directly on the unloading from each unit. Handles challenging products such as powder milk, powder cocoa, salt and others. The fixed scale in the TME models allow ultra fast discharge and more batches. New extraction system to avoid bridges in the hopper.

TMX (mobile scale)
